

From My Home

Please Join Me For An Educational Workshop!

- 54% of stay at home parents have a higher risk of developing cancer than those in the work place.
- The air inside your home is 200 to 500 times more toxic than the air outside
- Before, during or after... **CANCER** you can learn how to boost your immune system and rid your home of toxins!
- There are alternatives.

We have become toxic world! The reason why? We have accepted and trusted what is on the shelves at our local stores. We are under the assumption the government is protecting us against these dangerous products, they are not. We don't look for an alternative until either we are lucky enough to become informed prior to trouble or maybe not so lucky, we or a family member are affected through a worrisome disease.

Date: _____ Time: _____

Place: _____

RSVP: _____

For more information please contact: Stephan or Karlyn at (909) 419-7050 or Visit: www.trends2000.net/splash
