(Israelnationalnews.com) The horrors of history, the highs of humanity, they can all be found embedded in the Torah (Bible) Codes. Bible codes are Hebrew letters making up words which are found in equidistant sequences encoded in the Torah. The words they form can appear in horizontal, vertical, diagonal or even backwards directions and sometimes intersect each other, giving greater connective strength to a code.

On April 3rd, I interviewed Rabbi Matityahu Glazerson, an Israeli who is an expert in the Torah codes, and has authored over [25 books on different Torah topics](#), Jewish Mysticism, and other Judaic topics.

If you check out his [website and videos](#) at: [www.glazerson.com](http://www.glazerson.com) you will see some of the various historic or other news-shaking events that he has found in the Torah such as the following topics:

- \*Gadaffi's Defeat In Bible Codes
- \*Syrian Dictator, Bashar al-Assad's Downfall
- \*The Japan Tsunami and Redemption
- \*The Slaughter of the Fogel Family in Itamar last month

• Those are just a few, as visiting his website will show you codes which show dozens of other events, including the Gaza Flotilla, U.S. President Obama, and even a threat to the world by Korea. To listen to the show, click [HERE](#).

### Will the Moshiach (Messiah) come next year in 2012?

Torah code proponents know that one cannot predict the future with Bible codes because every future possibility is already encoded into the Torah. It is up to the free will of Mankind as to which future will materialize, therefore one may find a code that could portend an upcoming event, but it may or may not happen, and therefore, Torah codes should NOT be used to foretell events. However, it can be used to show when events could be RIPE to happen. Below is such a venue.

There is one event that most all of Mankind is waiting for, and that is the arrival of the Moshiach (Messiah). I will be asking Rav Glazerman about a video he put up showing the possibility of the Moshach coming in almost exactly one year's time from now, next Passover, 2012. In this video below, he shows the time could be ripe for just such an event.

Will it happen? No one knows. **We'll have to wait until next year to either laugh or cry.**
